Everyone wants to be a rockstar to their customers. But sometimes limited resources can prevent that.

That's where we come in...

Rock•star

[n. **rok**-stahr]

definition

1. Someone who stands out, above the rest. 2. Someone who impacts lives in their community, with an objective for the common good. 3. Someone who is known for their consistent delivery of a high quality product.

NORTH TECHNOLOGIES

Our mission is to complement your existing workforce by providing IT services and by giving you access to our global talent pool of software developers, network professionals, graphic artists, and engineers. We allow you to distribute your workload and target the areas that matter most to your customers.

We are an Oklahoma City based software development company, servicing local businesses and government agencies, with satellite development labs spread throughout the globe.

We provide services in the following ways:

- Software Development
- Software Project Management
- Technical Support Services
- IT Staff Augmentation
- IT Contract Services

Spend less time training, more time doing.

Save Time
Complement your existing staff with our pre-trained technical experts.

Reduce Cost
Utilize our global network only as long as the job requires.

Reduce Risk
You purchase the job accomplished. Milestones are contractual.

Our Process Will Blow Your IT Project Out of the Water

- Software development best practices
- HIPAA compliance
- Unprecedented global talent pool
- Fast prototyping
- Full-cycle quality assurance
- Free up your existing resources
- "Mobile"-ize your project
- Case management
- Document management
- App development
- 24-hour support

Be a Rockstar to Your Customers!

Bottom line: we ensure your investment of time and money yields results.
